

Game Changing Design

Zero is the **ONLY** edge sealer on the market that eliminates film waste. Zero consumes the lowest amount of shrink film compared to any side sealer on the market.

The resulting savings means lower packaging costs and a simpler, more operation friendly shrink wrapper with less maintenance.

The last real innovation in sealing technology was more than 35 years ago. Since then there have been improvements but no real transformation in the basic design. But everything changes **NOW**.

Zero is a radical shift in design, combining the versatility of a side sealer with zero film waste of a lap sealer. In many applications, Zero can consume less film than a lap sealer.

Example: Here's how much you can save with the Edge Sealer

Product size: 9.5" W x 2" H x 12" L
Film thickness: 45 gauge
Production speed (ppm): 73
Film consumption: 1 roll per hour
Bag size: 16 inches
1 roll yields: 4375 packages

Feet of film per roll: 5830
Roll cost per inch of film: \$16.20
8 hours production per day
5 days production per week

Annual Savings compared to the most competitive side sealer:
\$33,696

Use case 1: Using Extreme Zero edge sealer

Film requirement: 25" flat (12.5" CF)
Roll cost for 4375 products: **\$202.50**
Annual shrink film cost: \$421,200

Use case 2: Using the most competitive side sealer on the market

Film requirement: 27" flat (13.5" CF)
Roll cost for 4375 products: **\$218.70**
Annual shrink film cost: \$454,896

Zero Edge Sealer Benefits

- Zero waste
- 2" less film than the most efficient side sealer on the market
- Equal to or less film than a lap sealer
- Innovative design with fewer components
- No compressed air
- Can be used as top, side, or bottom seal
